

Mock Interviews

InterviewStream: **An online tool for interview practice.**

Step One: Getting Started

Use your own computer and webcam or make an appointment online to use the camera in Career Services. Just go to careerservices.neu.edu, choose "Career Tools" in the "Student Tools" box then click on the InterviewStream icon.

Step Two: Select Interview Questions

Choose your own questions from more than 1,000 options or use the preselected set of common interview questions.

Step Three: Record Your Interview

A virtual interviewer will come on screen and ask the questions selected, and each response will be recorded. You will have two minutes to answer the question. You can view each response and redo the answer as many times as you like.

Step Four: Upload & Share Interview

Your interview will automatically upload to the InterviewStream servers, and you will be emailed a link that connects you to a video of your interview. You can send this link to a career counselor or other advisor and ask for their feedback.

**Watching yourself on video
is the BEST WAY to improve your interview skills!**
